grimoire heralds of the winged exemplar v2

Even at $10 this game is still overpriced. Between the terrible audio, clunky UI, and the bugs I encountered just minutes into the game I cannot recommend this game. See the link and quote below from the dev where he states the game will NEVER go on sale. Ever. Cut to a now and it's 1\/3 the price.

https:\/\/steamcommunity.com\/games\/650670\/announcements\/detail\/1431434136007141225

"I have decided it is just a nice thing to do for people who have been waiting years to play my game if I offered a 10% discount on the game during it's first week. After this ends, I want to assure anyone waiting for the game that Grimoire will never, ever sell at a discount at any time it is on the Steam store ever again. I won't permit it to be sold below it's retail value for any reason. I am too proud of my finished product to permit it to be turned into simply another commodity in a Steam sale. If Valve ever decides that sales of the product no longer justify it having a page then I will move it to another venue - but as the author I will never offer my game at a discount again anywhere.". The game is pretty good if your into old school RPG. I bought the game pretty early on and since then it has been updated a fair amount for a one man Dev team. Gotta give it a negative though because of the clunky UI and also for the Dev being the kind of guy who ask for good reviews because he feels this game should be rated better and conspiracy theories about why its not... sorry man, asking for good reviews in the way you did is the lowest of the lows. get a PR manager because you can't handle it yourself. You brought USA politics into asking for good reviews. I can't even. (sigh).
